

## *Social Support Questionnaire*

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Social support is defined as having a network of people that support your endeavors, contribute positively to your decision-making processes, and are there for you when you need help.

Scientists have suggested that people with this kind of network around them can transcend even the worst environments and accomplish great things. Unfortunately, people who don't have this type of network have a harder time accomplishing even modest goals.

Remember: who you are today and who you become in the future has a lot to do with whom you choose to spend your time.

The following questions are designed to assess your level of social support, which strongly influences how well you follow any nutrition or exercise program.

A word of caution: once you recognize your challenges it's easy to blame them for your outcomes. Don't do this. Outside factors can affect you – if you let them. But you're in control. You have the power to place yourself in the right environment.

### YOUR SCORE AND WHAT IT MEANS

**28 to 38 total points:**

Congratulations, it looks like you've got a great social support network around you, a group of people that'll help support your desire to change some of your daily practices. Of course, that's not all you'll need to be successful. But it's a great start.

**5 to 27 total points:**

It looks like you've got some social support around you but there may be a few areas that will present challenges. Being aware of your social temptations, as indicated above, is a great place to begin.

**4 to -14 total points:**

Your social support is lacking and may need a makeover. However, you're not alone here. Many people struggle with social support. And that's why our coaching together will provide some strategies for enhancing your support network.

**-15 total points:**

This score is quite low and may signal some definite challenges in your work and at-home environments, as well as in your relationships.
